ARRA Funding: \$4 million for Bay Delta Conservation Plan (BDCP)  
Description: The Bay Delta Conservation Plan (BDCP) is being prepared through a collaboration between a number of State and Federal agencies, nongovernmental entities, and Potentially Regulated Entities (primarily Delta water diverters) to meet the requirements of the Federal Endangered Species Act (Federal ESA) and California Natural Community Conservation Planning Act. The BDCP may or

may not include a Habitat Conservation Plan (HCP) under the Federal ESA. The California Department of Water Resources intends to apply for Incidental Take Permits from the Services based upon the BDCP. These incidental take authorizations would allow the incidental take of threatened and endangered species resulting from covered activities, including those associated with water conveyance and the operations of the California State Water Project and Federal Central Valley Project.
